What is TMS?

- Many individuals impacted by MDD or OCD do not find enough relief with medication and therapy alone.
- TMS is a safe and effective FDA approved, scientifically proven, treatment that is covered by most insurance plans.
- TMS has demonstrated maximum effectiveness with minimal side effects.

There is Hope.

Treatment Can Help.

Living with depression or obsessive-compulsive disorder can feel overwhelming, but effective treatment options are available. When traditional treatments have not provided enough relief, innovative approaches such as Deep Transcranial Magnetic Stimulation (Deep TMS) may offer another path forward.

Referral Process

We welcome referrals from individuals, family members, professionals in the community, and community agencies.

Why Recommend TMS?

- Safe and effective treatment
- Non-invasive
- In-person daily sessions
- Covered by most insurance plans.
